WORK EXPERIENCE

Amazon Game Studios, Gameplay Engineer (Software Development Engineer I, II)

Aug 2022 - Current

New World Aeternum – Open world MMO on PC, Xbox, PS5

- ❖ Shipped original PC and Aeternum console release, **3 expansions and 8 seasons**.
- ❖ **Designed and implemented 3 large-scale headline gameplay features** including architecture, backend integration, console support, optimization and performance testing.
 - **Influence Races**: Open world PVP gamemode with up to 600 players fighting over control of 3 towers.
 - **Gear Set Storage**: Loadout system enabling players to save and swap equipment sets seamlessly.
 - **MTX Store Revamp**: Updated in-game microtransaction store with a new UI flow and backend hooks, streamlining content delivery and increasing store engagement metrics.
- ❖ **Owned 17+ Progression/MTX systems**: Items, Gear, Artifacts, Paperdoll, Inventory, Global Storage, Crafting, Gathering, Trade Skills, Currency, Loot, Game Event Rewards, PVP Reward Track, Seasons Pass & Reward Track, MTX Store Backend & Entitlements API integration, Influence Races, Gear Set Storage
- ❖ **Technical engineering across 7+ gameplay and backend teams**: Implemented synchronized currency for Catacombs game mode, wrote animation limiter on furniture to improve performance, strengthened game mode matchmaking system code to prevent race conditions from async service calls, and more!

Amazon Game Studios, Gameplay Engineer (Software Development Engineer I) Intern

May 2021 - Aug 2021

New World – Open world MMO on PC

- ❖ Owned new War Declaration and Influence feature (Social system). Fully implemented in one summer.

PROJECTS
